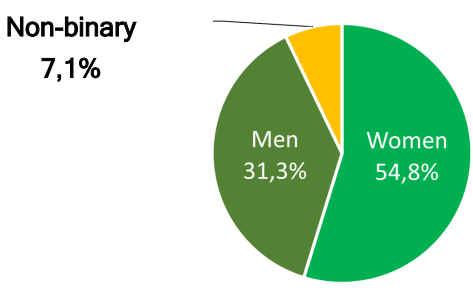
SPRINT
SUSTAINABLE PLANT PROTECTION TRANSITION

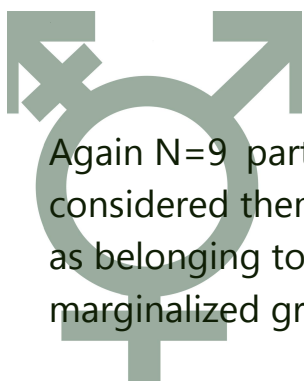
Self-assessment of gender capacities and perceptions

KEY FINDINGS
of the Second
Gender Survey
among all
SPRINT participants
Oct. 2025

Gender identity

All survey participants (n=42) disclosed their gender identity





Again N=9 participants considered themselves as belonging to a marginalized group

Gender Capacity progressed

Of the survey participants:

- 28,5% say their understanding has progressed
- Level of knowledge/proficiency to apply gender-sensitivity increased for
  - recruitment & career
  - division of tasks & credits
  - safe working space
  - collection and cross-analysis of data
  - interpretation of findings
  - communication materials

Training and Support

31% of survey participants had some gender training (13% in 2021)

Gender Awareness Progressed

Of the survey participants:

- 84% know about gender policies at their institution (50% in 2021)
- 78,5% say their institution has equal opportunities (68% in 2021)
- 29% report gender played a role in missing chances (20% in 2021)
- 69% support considering gender aspects in research content (38% in 2021)

Engagement and gender⁺ awareness and capacity increased.

The survey shows that the number of SPRINT participants engaged in and supportive to the project's commitment to foster gender equality has been strengthened.

Participants stating that their gender⁺ awareness and capacity has grown.
